PROFESSIONAL SUMMARY

AI/ML undergraduate and software developer with internship experience in application development, DevOps, AI agent evaluation, and product management. Built mobile and web products, developer tools, and CI/CD workflows; collaborated across teams to deliver user-focused solutions.

EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2024-2028	Bachelor of Technology (AI & ML)	Newton School of Technology (ADYPU), Pune	8.5/10.0
2022-2024	Intermediate (Class XII)	Janata Mahavidyalaya, Chandrapur	72.67%
2021-2022	Matriculation (Class X)	Dilasagram Convent High School, Ballarpur	93.6%

INTERNSHIPS

Software Development & AI Intern September 2026 - Present
CWI Studio
Worked on development of an ERP portal, contributing to application implementation and ongoing feature work.
Published apps as part of the internship, taking application work through to release.

Software Developer Intern September 2026 - Present
After Query
Trained and calibrated AI agents against task requirements; evaluated their responses on After Query tasks and documented errors to improve output quality.

Marketing Technology Intern August 2026 - September 2026
Martech Panthers
Built a WordPress website for a client; explored Zoho Projects and Zoho People for project and people workflows; extracted and organized prospect data with Apollo and Bouncify.

Product Manager Intern May 2026 - July 2026
Kognics
Designed and maintained app screens in Figma, tested the full app from a user perspective, and documented product requirements. Assigned daily tasks, coordinated across teams, and met clients to gather requirements.

DevOps Intern April 2026 - June 2026
Quant Trader Tools
Built CI/CD pipelines for a Tauri desktop application. Worked on Google sign-in and an auto-update flow so users could receive new versions without manually updating the app.

Product Management Intern December 2025 - March 2026
newwton llc *Remote*
Tracked product initiatives across engineering, UI/UX, DevOps, and design teams to align execution with delivery timelines. Translated requirements into actionable tasks and sprint plans with engineers and designers.

Software Development Intern April 2025 - July 2025
Aironotics Technology *Bangalore (Remote)*
Led a three-person team and developed authentication pages. Contributed to design, development, testing, and maintenance, reducing the bug rate by 15%. Coordinated work using GitHub and Slack.

PROJECTS

Aurora (Github) (Demo) October 2025
Built a React Native and Expo digital diary with journaling, mood tracking, photo uploads, a vision board, and a habit tracker; designed a pastel interface with page-flip animations.

PermKit (Github) (Demo) September 2025
Built a React Native permission utility for camera, location, microphone, and photo library access using react-native-permissions and platform-specific mapping.

StackMate (Github) (Demo) June 2025
Built a VS Code extension with Stack Overflow search, notes, JSON validation, a color picker, internet status, language switching, and tree visualization to reduce context switching.

QAI (Github) (Demo) April 2025
Built an AI quiz generator with Python, Flask, and the Gemini API that creates topic-based multiple-choice questions from user input.

EduAid (Github) November 2024
Contributed front-end UI and accessibility improvements, input validation, bug fixes, and pull requests to the EduAid open-source project.

CERTIFICATIONS

Open-Source Project Contributor Newton School of Technology (Link) April 2025
Maintained the WAP open-source project, reviewed contributions, coordinated team tasks, fixed bugs, and guided feature development.

Letter of Recommendation (LOR) Newton School of Technology April 2025
Awarded by Newton School of Technology for performance as an open-source maintainer of a college project.

Freedom with AI Masterclass Freedom with AI April 2025
Completed hands-on training in ChatGPT, DALL-E, Make.com, Zapier, prompt engineering, and AI-assisted content creation.

Generative AI for Everyone DeepLearning.AI / Coursera (Link) March 2025
Studied generative AI models, neural networks, and AI-driven content generation.

RELEVANT COURSEWORK

Data Structures; Database Management Systems (DBMS); Operating Systems; Computer Networks; Object-Oriented Programming (OOP); Software Engineering; Machine Learning

ACHIEVEMENTS

Smart India Hackathon: Selected for Overall Evaluation (Waitlist) for an offline AI-powered study application.

EXTRA-CURRICULAR ACTIVITIES

Core member of Techfest Organizing Committee at Newton School of Technology: Helped plan and coordinate events.
Open-source contributor and Hacktoberfest participant.

SKILLS

- **Computer Language:** Python, C++, TypeScript, HTML, CSS, JavaScript, C
- **Frameworks & Libraries:** Next.js, Pandas, Express JS, Tailwind CSS, React, React Native, Node.js
- **Databases & Data Tools:** MongoDB, MySQL, Supabase
- **AI / ML:** Hugging Face
- **Domain & Business Skills:** Figma, UI/UX, Product Management
- **APIs & Testing:** Agile Methodologies
- **Cloud & DevOps:** Git and Github, DevOps
